About Us

BlueEyes Technology Group was established in 2004 and is headquartered in Taiwan. Corresponding to the rapid growth of Closed Circuit Television systems, we have led the industry with professional web application technology, surveillance systems, and video compression technology. Through the completion of high profile government projects, BlueEyes Technology has become the benchmark for quality and is well-known both internationally and across related industries.

BlueEyes Technology Group specializes in research and development. Our high-tech service centers ensure that we provide the highest quality products and services. Our focus on customer satisfaction enables us to develop cutting-edge surveillance products for education, government, transportation, retail, and banking. In addition, BlueEyes is not only the pioneer, but also the top brand in Taiwan's education market.

SCAN ME

LOL Online Learning Platform (e-Learning, MOOCs, enterprise training)

24H Perfect Learning

Be your own learning master! LOL offers flexible learning for students.

Auto video conversion engine

- › Auto video conversion engine compresses and converts videos automatically. It supports most video formats and shortens the video handling time. BlueEyes spent about 6 months to develop this unique function so that you can spend your time on other things.

24H trial lessons

- › LOL offers 24H trial lessons for students, allowing them to evaluate course content and teacher quality.

Customizable web interface

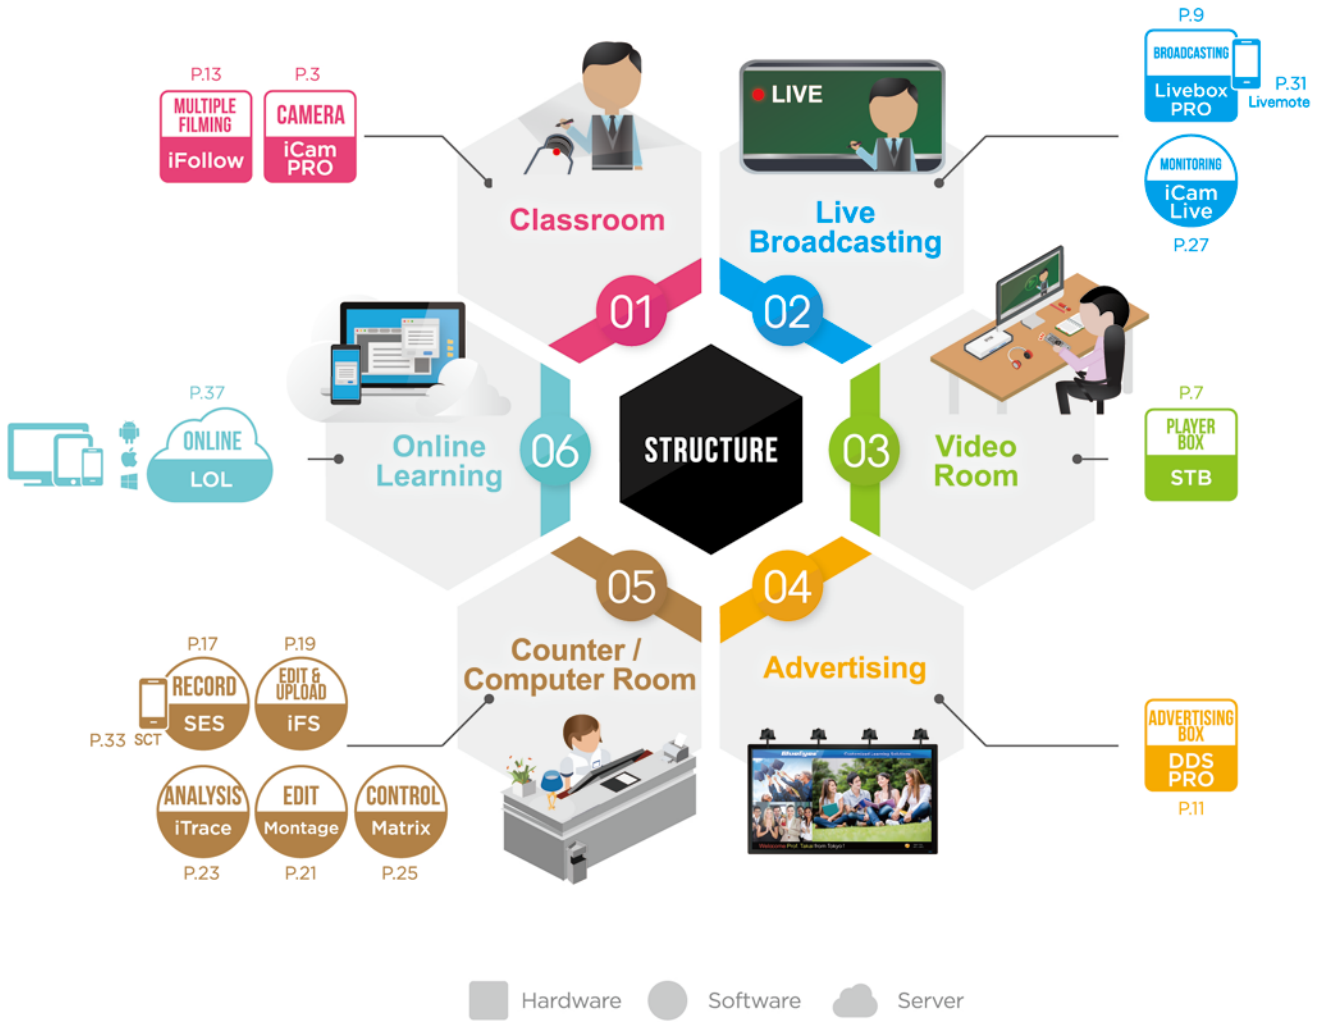

- › Customizable web interface helps you create your own LOL style. 24-hour advertising with embedded marketing allows greater publicity and exposure on the internet.

Designed just for you

- › Upload pictures to create your own photo albums.
- › Send instant messages, exam results, and important notices via SMS. Save your own preset messages and send unlimited text via imported EXCEL file.
- › Monitor delivery status with package tracking functionality.

Powerful administration management

- › Grant user points.
- › Watermark function.
- › Secure copyright protection technology.
- › Free registration via Facebook or Google+.
- › Save your own preset messages and send unlimited text via SMS.
- › Flexible course and video publishing functionality.
- › Customizable permissions for teachers and students.
- › Free advertising via trial packages.
- › Advanced dynamic watermark module effectively prevents pirating.
